## CATNIP

### Catnip spray 120 ml

Catnip spray is a liquid product made from the essential oil of the catnip plant (*Nepeta cataria*). It is designed to stimulate cats by releasing the active compound called nepetalactone, which has a euphoric effect on many felines.

### Uses of Catnip Spray

1. Training Tool: Spray on scratching posts or toys to encourage cats to use them instead of furniture.
2. Playtime Enrichment: Apply to toys, bedding, or other surfaces to make them more appealing and engage your cat in play.
3. Stress Relief: Use in carriers or new environments to help cats feel more relaxed.

### How to Use Catnip Spray?

1. Shake the bottle well before use.
2. Spray a small amount on the desired surface (e.g., toys, scratching posts, or bedding).
3. Let your cat approach and interact naturally.

Avoid overusing the spray, as frequent exposure may reduce your cat's sensitivity. Not all cats respond to catnip, as sensitivity is genetic and typically develops after 3-6 months of age.

## CATNIP

### Catnip powder 85g

Catnip powder is a finely ground form of dried catnip leaves and flowers, designed to stimulate your cat's natural instincts. Packed with the active compound nepetalactone, it encourages playful, relaxed, or stress-relieving behavior.
